VITAL INSIGHT ANNOUNCES RECORD REVENUE GROWTH IN THIRD QUARTER

Company Continues Strong Revenue Growth and Launches New Product Offering

Austin, Texas – October 15th, 2007 – Vital Insight, a Central Texas company offering advanced Governance Risk, and Compliance (GRC) solutions, today announced that revenues for the third quarter of 2007 increased 207% over a similar period in 2006. New product offerings and focus on new industries fueled much of the growth, with the company offering a new Enterprise Risk Management (ERM) solution, and adding several key credit union customers.

“We continued to add customers for our SOX Essentials product, and also established a strong presence in the Credit Union industry with our ERM Essentials offering. We see a great opportunity in this industry,” said Tom Scanland, Vice President of Marketing and Business Development. “Even more importantly, our ability to continually produce new and valuable products and services for our customers will mean strong performance for years to come.”

Vice President of Products, Mark Prentice added, “Our products are gaining adoption very quickly. They provide the key functionality our customers need, are simple and inexpensive to implement, and can give our customers great value far beyond simple compliance with audit, SOX, and regulatory requirements.”

ABOUT VITAL INSIGHT

Vital Insight is an Austin, Texas-based company founded by experienced entrepreneurs and former Big 4 consultants. The company’s flagship product, Governance Insight, is an easy-to-use, database-driven software application that allows companies to centrally manage and document all processes, risks, and controls associated with Governance, Risk, and Compliance (GRC). Vital Insight’s customers experience significant savings and value-added business intelligence by streamlining their compliance and risk management programs with Governance Insight.
